Vehicle Guidelines

The Technical Committee has been asked by the Board of Directors to establish guidelines for an acceptable automobile as described in the bylaws. The following are recommendations made by the Technical Committee:

BODY

The body must remain stock and primarily unmodified. Non-original period accessories, such as continental kits or fender skirts are allowable modifications

PAINT

Stock appearing in color scheme, the color does not have to be original. It must, however, be done in a manner acceptable during the period of manufacture.

CHROME

Bumpers and stock chrome must remain intact. Period accessories, such as spotlights, bumper over-riders, etc. are permitted

INTERIOR

Must be stock and original as possible, material may be non-original. Safety items, such as seat belts, are accepted and encouraged. Add-on air conditioning or stereo radios will not reject a vehicle.

TIRES & WHEELS

Not restricted as to style and type. Dimensions must remain close to original

ENGINE COMPARTMENT

Engine may be non-original as long as it retains it's stock appearance and the vehicle meets all of the other specifications

SUSPENSION

Stock type suspension must be retained (sub-frames not permitted). Safety items, such as substitution of hydraulic brakes for mechanical brakes is permitted

DRIVE-LINE

Rear end must retain original appearance. Transmission must also retain original appearance including shifter.
